

# Venue helps to light up big day

A WEDDING lighting business has invested £10,000 in a new product featuring personalised animations.

Cleckheaton-based Wedding Venue Lighting has purchased a mirror photo booth which offers party goers the opportunity to have their own personalised animation feature on screen.

The animation can be designed in many forms, from love hearts for weddings to stars and fireworks for an evening ball.

The booth itself takes multiple photos of guests with optional props, then instantly prints out a copy of the images on a personalised stationery sheet for guests to take away. Matt

Butcher, founder and managing director of Wedding Venue Lighting, said: "It is fantastic to be one of the only suppliers in the North of England able to offer this unique service. The booth adds sparkle and enjoyment to every event and it's a pleasure being able to delight our customers on their special day."
